Revision Test-1 (English) (16.1.2020)

Class - VII

1. Read the passage carefully:

Set in the declining but still green Western Ghats in the southwest of Karnataka, Coorg is the heart of India's coffee country, coffee being the world's most heavily traded commodity after crude oil. Coorg boasts a land area four times larger than Hong Kong and seven times the area of Singapore, most of it under tree cover because unlike tea plants, the coffee bush requires shade.

India is acknowledged as the producer of finest mild coffees. With their tropical climate, high altitude, abundant rainfall and fertile soil, coorg and the neighbouring Chickmagalur districts in Karnataka have consistently produced and exported high quality coffee for over 150 years. The coffee output of these two districts accounts for 70 percent of the total coffee produced in the country. Coorg coffee is valued for its blue colour, clean beans and fine liquorizing qualities and hence is in demand in the international markets. In March and April the coffee blossoms in Coorg. When blossoms transform into berries, the bushes are cropped. The cherry – red fruit is then pulped; the seeds separated, dried and sent for curing.
