# Pinwheel

Let's make a pinwheel. Follow the given steps to make your toy.

## STEPS

- 1 Take out the given sheet of paper and cut squares out of it (as many as you want).
- 2 Using scissors make small cuts, towards the centre, at every corner of the square paper.
- 3 Beginning at one corner and repeating the same process at every corner, fold the paper towards the centre.
- 4 Keeping the four corners one upon the other, carefully poke the pin through them. Take your teacher's help for this.
- 5 When the four corners are tucked in the pin, poke the end of the pin through the centre of the pinwheel and into the eraser of the pencil.

**Your pinwheel is ready. Point it into the wind!**
