

## **Save Water Ambassadors of SBPS**

'A small action by each can result to a vast change.'

Keeping this in mind students of Sarala Birla Public School took a small initiative to save water. Students formed groups and came up with ideas through which they can save water in our day to day life. The best ideas were selected and the students were categorised under group named 'Save Water Ambassadors'. Through this drive they encouraged all to implement various ways through which water can be saved effectively and they received a positive response and support from all.

School Head Personnel and Admin Mr. Pradip Varma appreciated the students and said that such campaigns make the students socially responsible and environmentally conscious.

School Principal Mrs. Paramjit Kaur said that such initiative taken by the school students will make the future generation aware about the depleting resources and ways to conserve them.

## **SILENCE OBSERVATION**

A two minute silence was observed in SBPS as a mark of respect to Priyanka Reddy, a Hyderabad veterinary doctor who has been abducted, and burnt impertinently.
