Count Wisely

One day, King Akbar asked a question in his court which surprised everyone in the court. As they were all trying to find out the answer, Birbal came in and asked what was the matter. He repeated the question to him.

The question was, "How many crows are there in the city?"

Birbal immediately smiled and went to Akbar. He announced the answer. He said, there were twenty one thousand five hundred and twenty three crows in the city. When Akbar asked, how he knew the answer, Birbal replied, "Ask your men to count the number of crows".

If there are more, relatives of crows may be coming to them from nearby cities. If there are fewer, then the crows of our city must have gone to their relatives living outside the city."

Pleased with the answer, Akbar presented Birbal with a ruby and a pearl chain.

Moral – Having an explanation for your answer is just as important as having an answer.
